

COVERWORLD
UK LIMITED

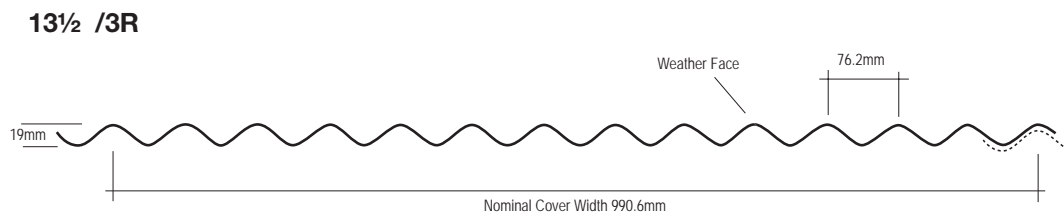

Coverworld's standard range of profiled roofing sheets are shown below. Details of shape, dimensions, weight and typical data of the different Coverworld profile types and products are included in this manual in the form of data sheets.

Each data sheet contains all the relevant information and incorporates wind loading tables.

Available in a choice of thicknesses, finishes and colours, there is a Coverworld product to suit every requirement.

COVER-6 has been designed to precisely match the standard dimensions and pitch of 'Big 6' asbestos and cement-fibre sheeting, enabling easy positioning. In addition it provides a sealant beading groove for added protection.
